Mobile Menu – Attractive to vision and palate

simple • unique • innovative

Classic

A mature, tried-and-tested system!

Our ClassicLine has been improved in countless ways over the years, customer feedback and manufacturer flexibility have evolved to a perfect meal distribution tool. Numerous details and well-thought-out components ensure that aromatic, tasty and appetizing meals arrive at the recipient.

ClassicLine

6 Reasons to choose ClassicLine

Appetizing.

Because food served on real china is the best way to present attractive meals.

Compact.

Because hot and chilled courses can be served simultaneously and are kept perfectly separate.

Economical.

Because strong-walled compact trays are without welded seams, assuring nearly unlimited lifetime with good treatment.

Ergonomic.

Because well-thought-out design eases proper portioning. And high plate rims permit even one-hand or impeded eaters to eat without external help.

Safe.

Because the slosh-free inner lids prevent meal components from spilling or running together and a unique lid-lock ensures absolute protection against slippage or falling, even along the most difficult transport routes.

Ecological.

Because reusable systems avoid large amounts of waste. And because energy is ideally utilized, thanks to environmentally friendly insulation foam.

Go ahead, place high demands.

MenuMobil will convince you at every turn.

EcoClassic

The meal transport system with extraordinary cost/benefit ratio

The tried-and-tested compact tray for transporting pre-portioned menus of chilled and hot menu components. The latest innovation of the EcoClassic: a hardshell of EPP plastic foam.

High-tech insulation, unbreakable, lightweight, dishwasher safe and visually attractive in three colours are its outstanding attributes.

A well-thought-out system

Included in the compact transport box are insert sleeves for name-labels and colour-coding, i.e. for special diets.

Two colour variants

EcoClassic is available in two colours: grey and blue.

ClassicLine

Universal

The best solution for you?

With MenuMobil Universal you can, in addition to soup, main course and dessert/salad, also serve fruit and rolls. The extended shelf can also hold cutlery. An aesthetic, transparent cover permits pleasant viewing of contents at any time. Particularly well suited for long, steep or bumpy transport routes.

Our assortment of dishware and accessories

Individually adjustable. Optimally combinable.

Upper and lower parts of Classic, EcoClassic and Universal models are of course stackable and compatible with other MenuMobil products. Custom-designed carts for storage and transport to optimize time-cutting and space-saving handling are available. We also have tried-and-tested solutions on offer for transporting the completed meal units. **Well-thought-out. Economical. Inexpensive.**

Perfect meal distribution with system.

Through the multi-faceted product range by MenuMobil you have the right system for every deployment.

ClassicLine

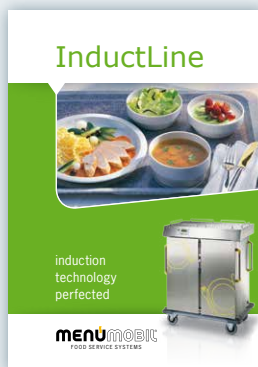

- Classic
- EcoClassic
- Universal

The compact transport system provides optimal insulation of chilled and warm meal components for perfect temperature-regulated meal enjoyment. Hygienic. Appetizing. Economical.

Inducook ClassicLine

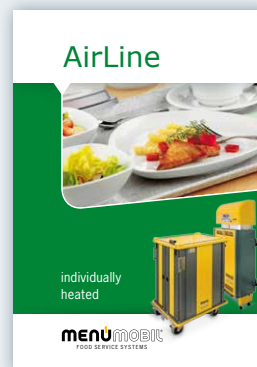

Delivered chilled, served hot. The simple-to-use induction technology warms only the correspondingly layered dishware; salad and dessert remain chilled. A full variety of meal enjoyment is assured.

InductLine

- Indock

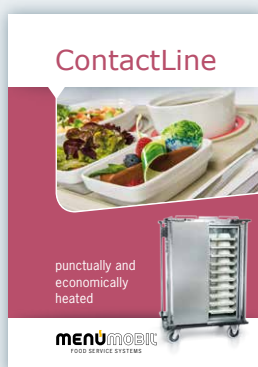

Innovative induction technology combined with tray-transport cart. Through electronic control system, meals are generated to the correct temperature at just the right moment.

AirLine

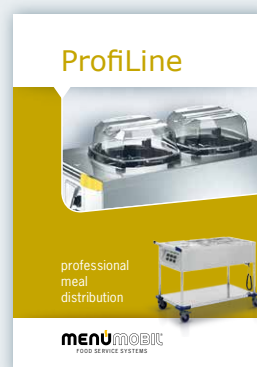

- AirLine Buffet

Heat and actively chill – all in the same transport cart. Via electronic control system meals are heated with hot air and desserts/salads separately cooled.

ContactLine

Through contact heating this line integrates intelligent temperature regulation right into the tray. Energy flows through the heat zones into the correct dishware for hot components. The transport cart delivers energy only into those slots in use.

ProfiLine

Robust, matured-to-perfection, intelligent – available in a wide array of distribution carts, plate dispensers, stacking equipment and transport carts. The professional collection for economical kitchen work at optimal cost/benefit ratio.
